## ICON LEGEND

# FEATURES LEGEND

**Color 4D with Advanced Technology™** delivers richer, longer-lasting color, enhanced durability, and built-in protection. Using proprietary ingredients and in-line treatments, these pavers resist UV rays, stains, and acid rain—no sealing required! Look for the Color 4D with Advanced Technology™ logo on select pavers for next-level performance and fade-resistant beauty.

*Pages 26 - 51*

Our **Genuine Drum-Roll Tumbled™** pavers and walls bring timeless character to any project, combining the look and feel of the vintage stones of yesteryear with the quality and consistency of today's high strength concrete. Through our Genuine Drum-Roll Tumbled process, each paver and wall unit is authentically aged for rich, weathered texture and lasting strength delivering true old-world character.

*Pages 52 - 57, 80 - 81, 86 - 87, 110 - 115*

Our **traditional** pavers and walls provide a classic, timeless look in a variety of shapes, textures, and colors. Offering lasting beauty, superior strength, and durability, they're a cost-comparable yet longer-lasting alternative to stamped concrete, asphalt, or composite decking.

*Pages 58 - 69, 78 - 79, 84 - 85, 90 - 97*

Stormwater runoff harms water quality and wildlife, prompting limits on impervious surfaces. Our **permeable pavers**—like Aqua-Bric, Andover, Portsmouth Cobble, Turfstone and Brookstone—allow water to drain through the larger joints, reducing runoff and naturally filtering pollutants.

*Pages 30 - 33, 36 - 39, 44 - 47, 62 - 63, 70 - 75*

**CastStone** products combine the elegance of natural stone with the strength of engineered concrete. Ideal for coping, steps, wall caps, and accents, they deliver a smooth, refined finish and lasting performance in any weather.

*Pages 98 - 99, 102 - 109*

**Hearthscapes by Ideal** fireplaces bring the warmth of a real fire to your backyard. Precast and pre-assembled with fire-brick lining, they're easy to install, customizable with stone or brick, and built from high-strength concrete to endure New England weather.

*Pages 118 - 125*

**Natural Stone by Ideal** pairs beautifully with our pavers and walls for a cohesive, timeless look. Available in granite, bluestone, fieldstone, and flagstone, and many other natural stones, it adds style and durability to fireplaces, patios, walls, steps, and more—indoors or out.

*Pages 126 - 143*

# DISCOVER A LIFE EMBRACED OUTDOORS

Decades ago, Leo Burgoyne laid the cornerstone for a lasting legacy characterized by two core principles:

## **Quality and Service.**

When he christened his enterprise "Ideal," it wasn't merely a reference to the machinery he used in production; it symbolized a pledge to uphold unparalleled standards of excellence and customer satisfaction. Built upon traditional family values, Ideal has remained steadfast in its mission to produce premium concrete products, enriching lives through the creation of exceptional outdoor living spaces.

Leo's unwavering work ethic during the tumultuous eras of the Great Depression and World War II set a precedent for Ideal's enduring dedication. His motto-

## **"Through service we grow"**

-became a guiding beacon passed down through successive generations. Joe, Leo's son, continued to navigate the company until 1990, ensuring that these principles remained the cornerstone of Ideal's operations. Ideal doesn't simply manufacture concrete blocks; it crafts the essence of outdoor living. That ethos has been faithfully embraced by the 2nd, 3rd and 4th generations that followed. Leo's pursuit of manufacturing the highest quality concrete blocks can be found today in our line of outdoor living products that celebrate the New England lifestyle.

**"Life Embraced Outdoors" isn't just a slogan; it embodies Leo's timeless dream from a century ago.**

Today, Ideal doesn't just meet standards; it sets them. The commitment to quality and service reverberates through every concrete paver, retaining wall block, and complementary concrete element, crafting environments that transcend boundaries.

Each day, Ideal continues to push the boundaries for homeowners, contractors, professional landscapers, commercial building owners, and architects, addressing their most exacting requirements. From pavers engineered with **Color 4D with Advanced Technology™ to Drum—Roll Tumbled™** pavers and walls, Ideal offers patented solutions that exemplify excellence, setting new benchmarks for those who seek to embrace outdoor living.

This is why, when it comes to selecting an outdoor living solution, Ideal remains the premier choice for the Northeast, renowned for its quality, diversity, affordability, and durability.

# WHY IDEAL BLOCK

**Ideal** – As a 4th generation family-owned business, we take pride in honoring the Ideal tradition of “Through service we grow,” that has been proudly passed down through four generations of the Burgoyne family.

**A name you can rely on** – We have made New England our home for over 100 years and, in 1975, were one of the first companies in the United States to manufacture concrete pavers. We bring you over 50 years of experience and have sold millions of square feet of pavers and countless walls throughout New England! You can feel confident using Ideal. Our products are backed by a Lifetime Warranty and our name. After all, you might say we are time tested since 1923.

**Our commitment to quality** – We take great pride in producing the finest concrete products manufactured according to strict industry specifications and benchmarked by our exacting internal standards. Our commitment to excellence ensures superb quality, exceptional strength, lasting durability, and consistent, rich color.

**We are here for you** – Ideal values our relationship with our customers. We have partnered with an extensive network of Authorized Dealers throughout New England who share our core values to provide responsive customer service and expertise that goes beyond your needs.

# GET THE *Leo*<sup>®</sup> LOOK

Designing the perfect outdoor space doesn't have to be overwhelming. Our team is here to guide you every step of the way—from selecting the right materials to creating a hardscape design that blends beauty, function, and lasting durability. Whether you're envisioning a welcoming patio, a stylish walkway, or a complete outdoor living area, we'll help bring your ideas to life with expert advice and personalized solutions. Ideal's design services can help you create a Life Embraced Outdoors.

## 1 Define Your Vision & Start the Planning Process

- Gather photo references from catalogs, social media, etc.
- Identify how the space will be used. Are you looking for a place to entertain, a walkway for accessibility, or maybe a retaining wall to create more usable space? Define the goal of your project.
- Choose a style that compliments your home and fulfills your style. Look at colors, textures, and shapes of products. Make sure to receive physical samples to see how they look in different elements.

## 2 Putting Your Project in Motion

- Professional or DIY - determine if you will choose a trusted contractor to complete the installation, or review resources at [IdealBlock.com](http://IdealBlock.com) to see if self installation is the way to go.
- Review applicable local regulations and permitting requirements.
- Measure the area and start designing the space. Remember, the functionality of your space is just as critical as its visual appeal.

### 3 Finalize Your Materials, Colors, & Textures

Remember, your product cost is only a small portion of the total cost.*

### 4 Finalize Any Elements & Finishing Touches

- Finalize any elements and finishing touches you would like to include in your outdoor living space - steps, fire pit, fireplace, outdoor kitchen, lighting, pillars, etc.
- Remember, if it doesn't fit your current budget, you can always add to the space later on.

# 2D PLAN

# PROJECT TIMELINE

Full scale outdoor living spaces can take several months from planning to completion. Let us help you keep the process on track!

## Start the Planning Process for Your Project *4-6 Weeks*

Explore design inspiration and review applicable local regulations. Remember, the functionality of your space is just as critical as its visual appeal.

## Selecting a Contractor *(If Applicable)* *1-2 Weeks*

Whether engaging a trusted contractor or leveraging our resources to identify one, this stage is dedicated to finalizing your project timeline and initiating the product selection process.

## Designing Your Space *2-6 Weeks*

This is the most enjoyable stage! Ideal offers design assistance and product samples so you can see color, shape, and texture in your space.

## Installation *2-12 Weeks*

Factors such as permits and weather may influence the pace of your project, but each step is part of ensuring lasting quality. Depending on the level of detail, installation can take anywhere from a few days to several weeks.

## After Installation

Consider having your pavers, walls and elements sealed to protect your investment. Now it's time to sit back, relax and enjoy a Life Embraced Outdoors.

# COLOR 4D WITH ADVANCED TECHNOLOGY

IT'S MORE THAN  
JUST CONCRETE™

Advanced Stain  
Resistance

Advanced  
Color

Advanced Efflorescence  
Protection

Advanced  
Durability

# WHY SHOULD YOU CHOOSE COLOR 4D WITH ADVANCED TECHNOLOGY

Our advanced 4D Technology™ combines proprietary ingredients with in-line treatments to enhance appearance and deliver deeper, richer color with long-lasting performance. Color with 4D Technology™ pavers are factory treated and protected, eliminating the added time and cost of post-installation sealing.

They provide immediate protection against UV exposure, stains, spills, and acid rain, while maintaining lasting color retention. These pavers meet or exceed ASTM C936 and CSA 231 standards, maintain a slip- and skid-resistant surface, and help reduce efflorescence.

Look for the Color 4D with Advanced Technology™ logo on select products.

## Advanced Stain Resistance

- ✓ Stain & Acid Rain Resistance
- ✓ Easier to Clean

## Advanced Color

- ✓ Fade Resistance
- ✓ Enhanced Color

## Advanced Efflorescence Protection

- ✓ Inhibits Efflorescence
- ✓ Inhibits Polyhaze

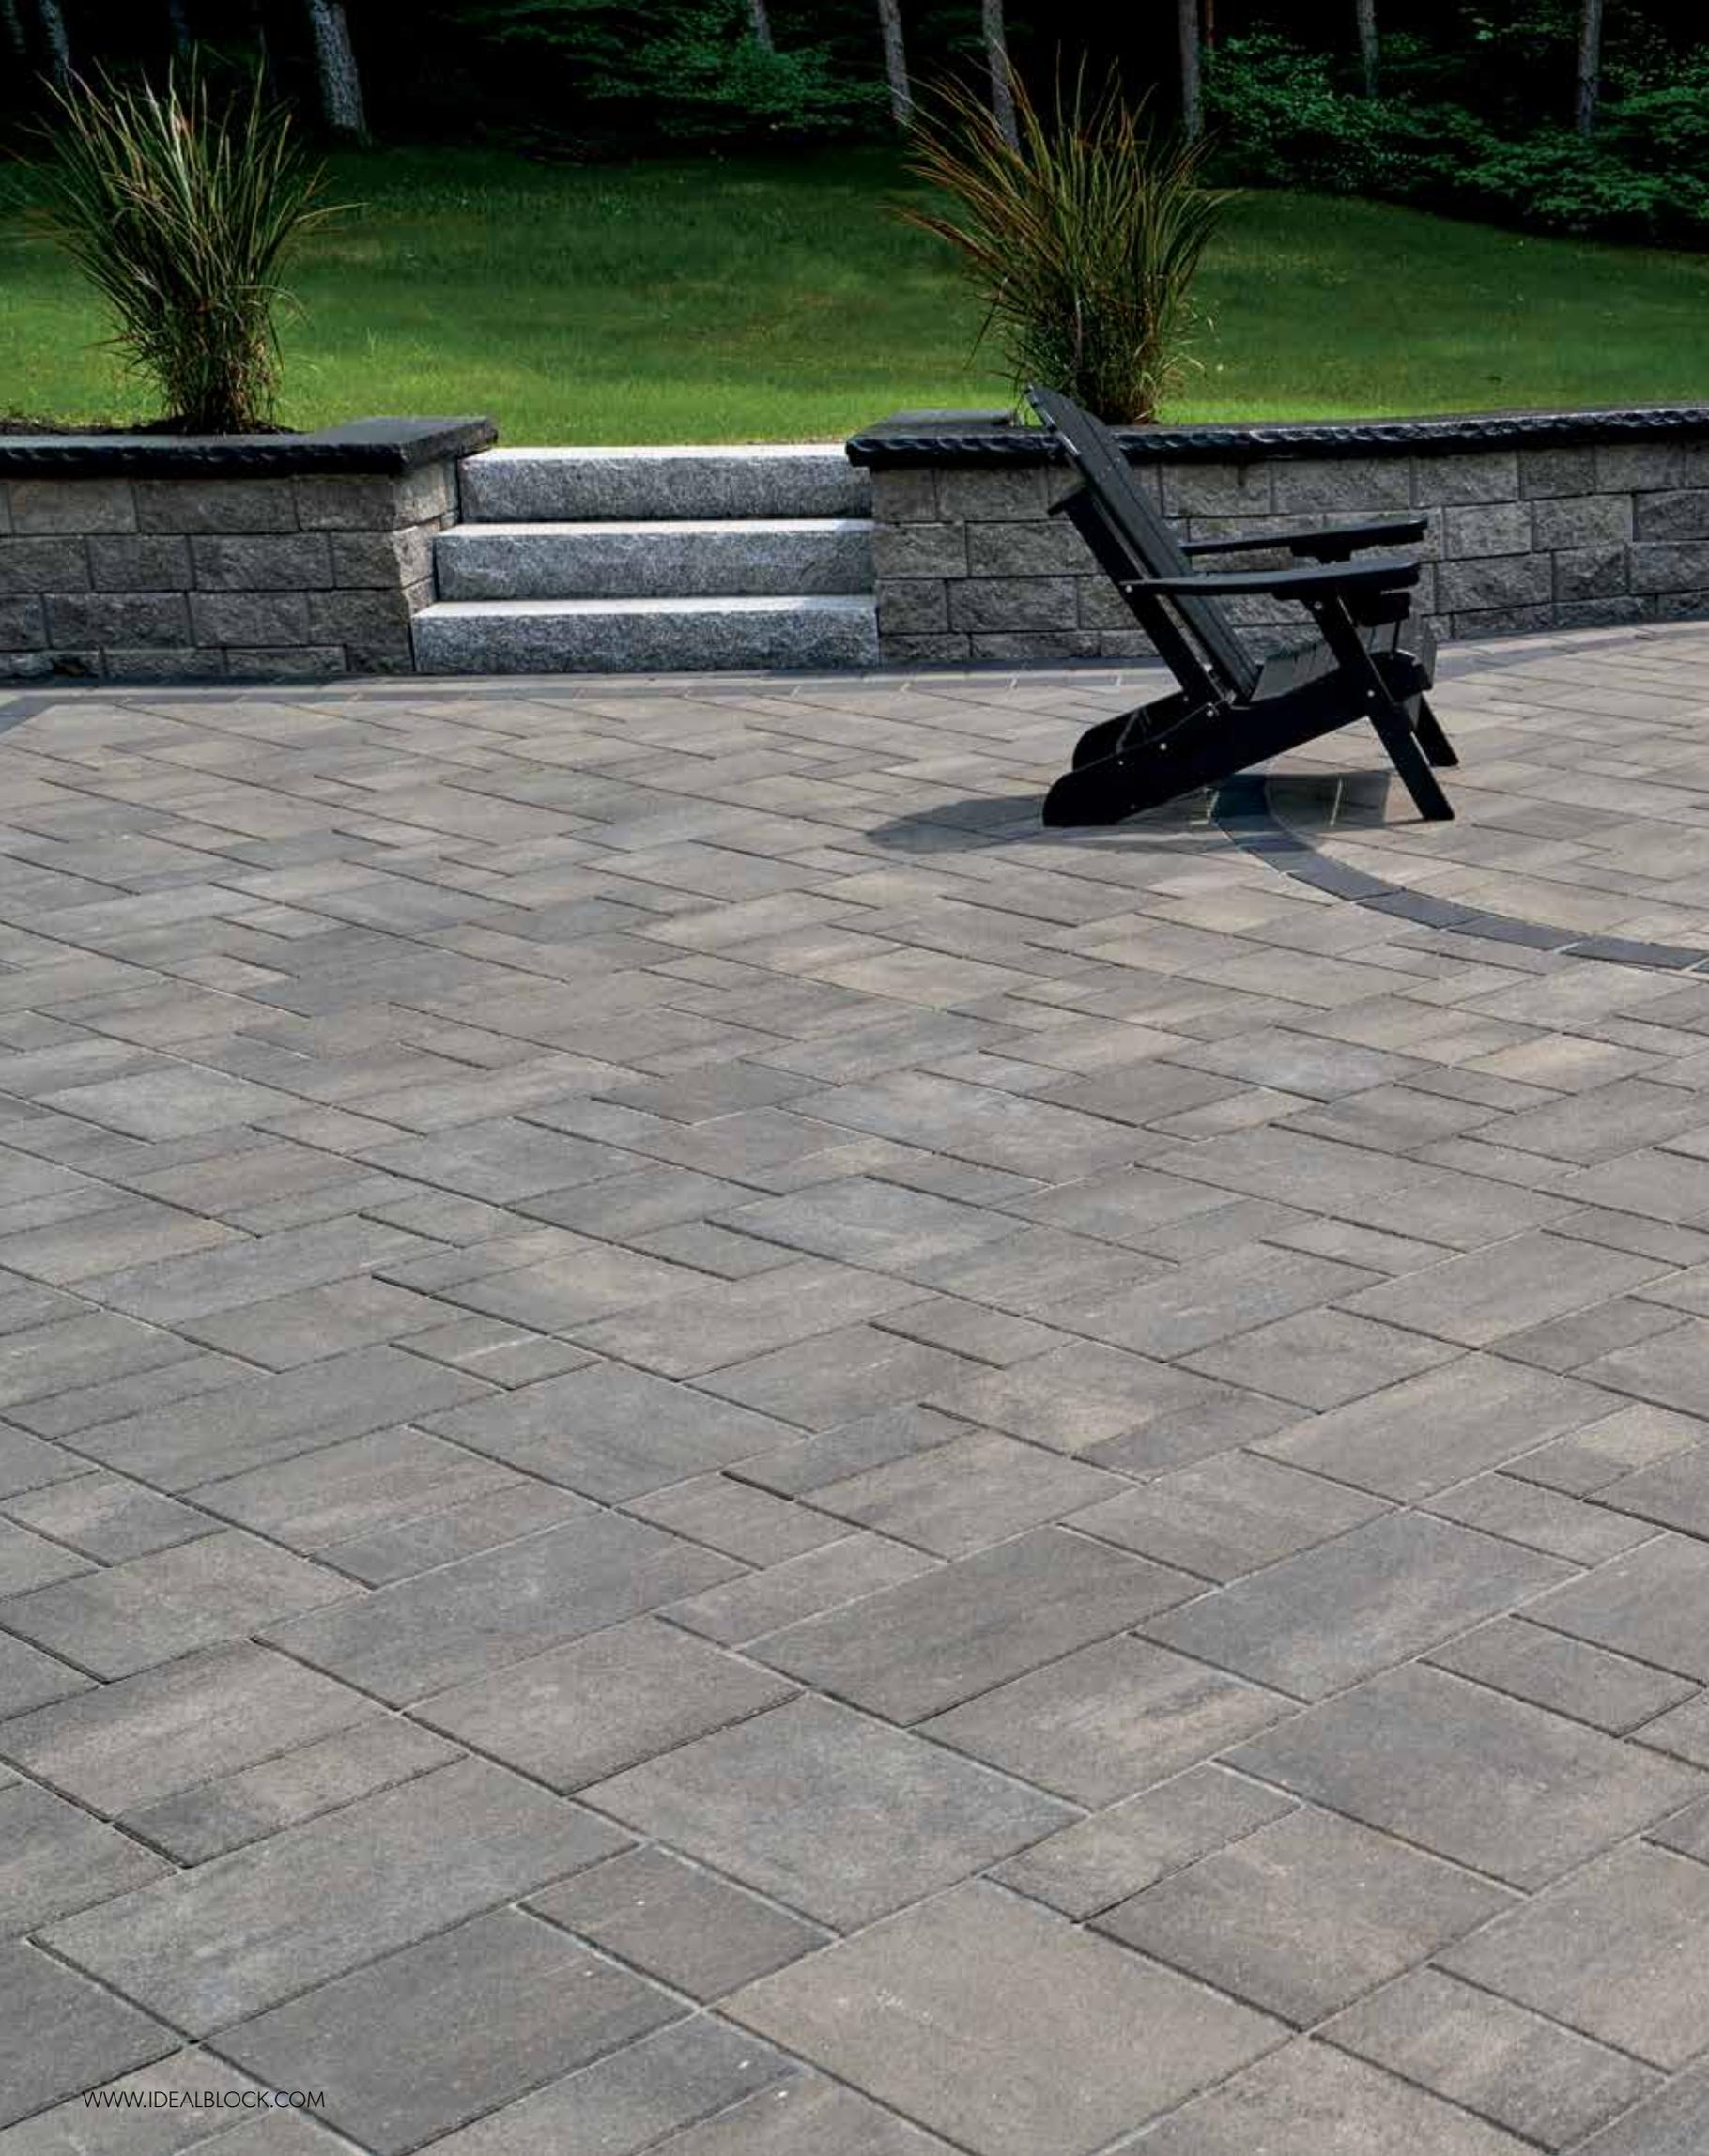

## Advanced Durability

- ✓ Salt Resistance
- ✓ Wear Resistance

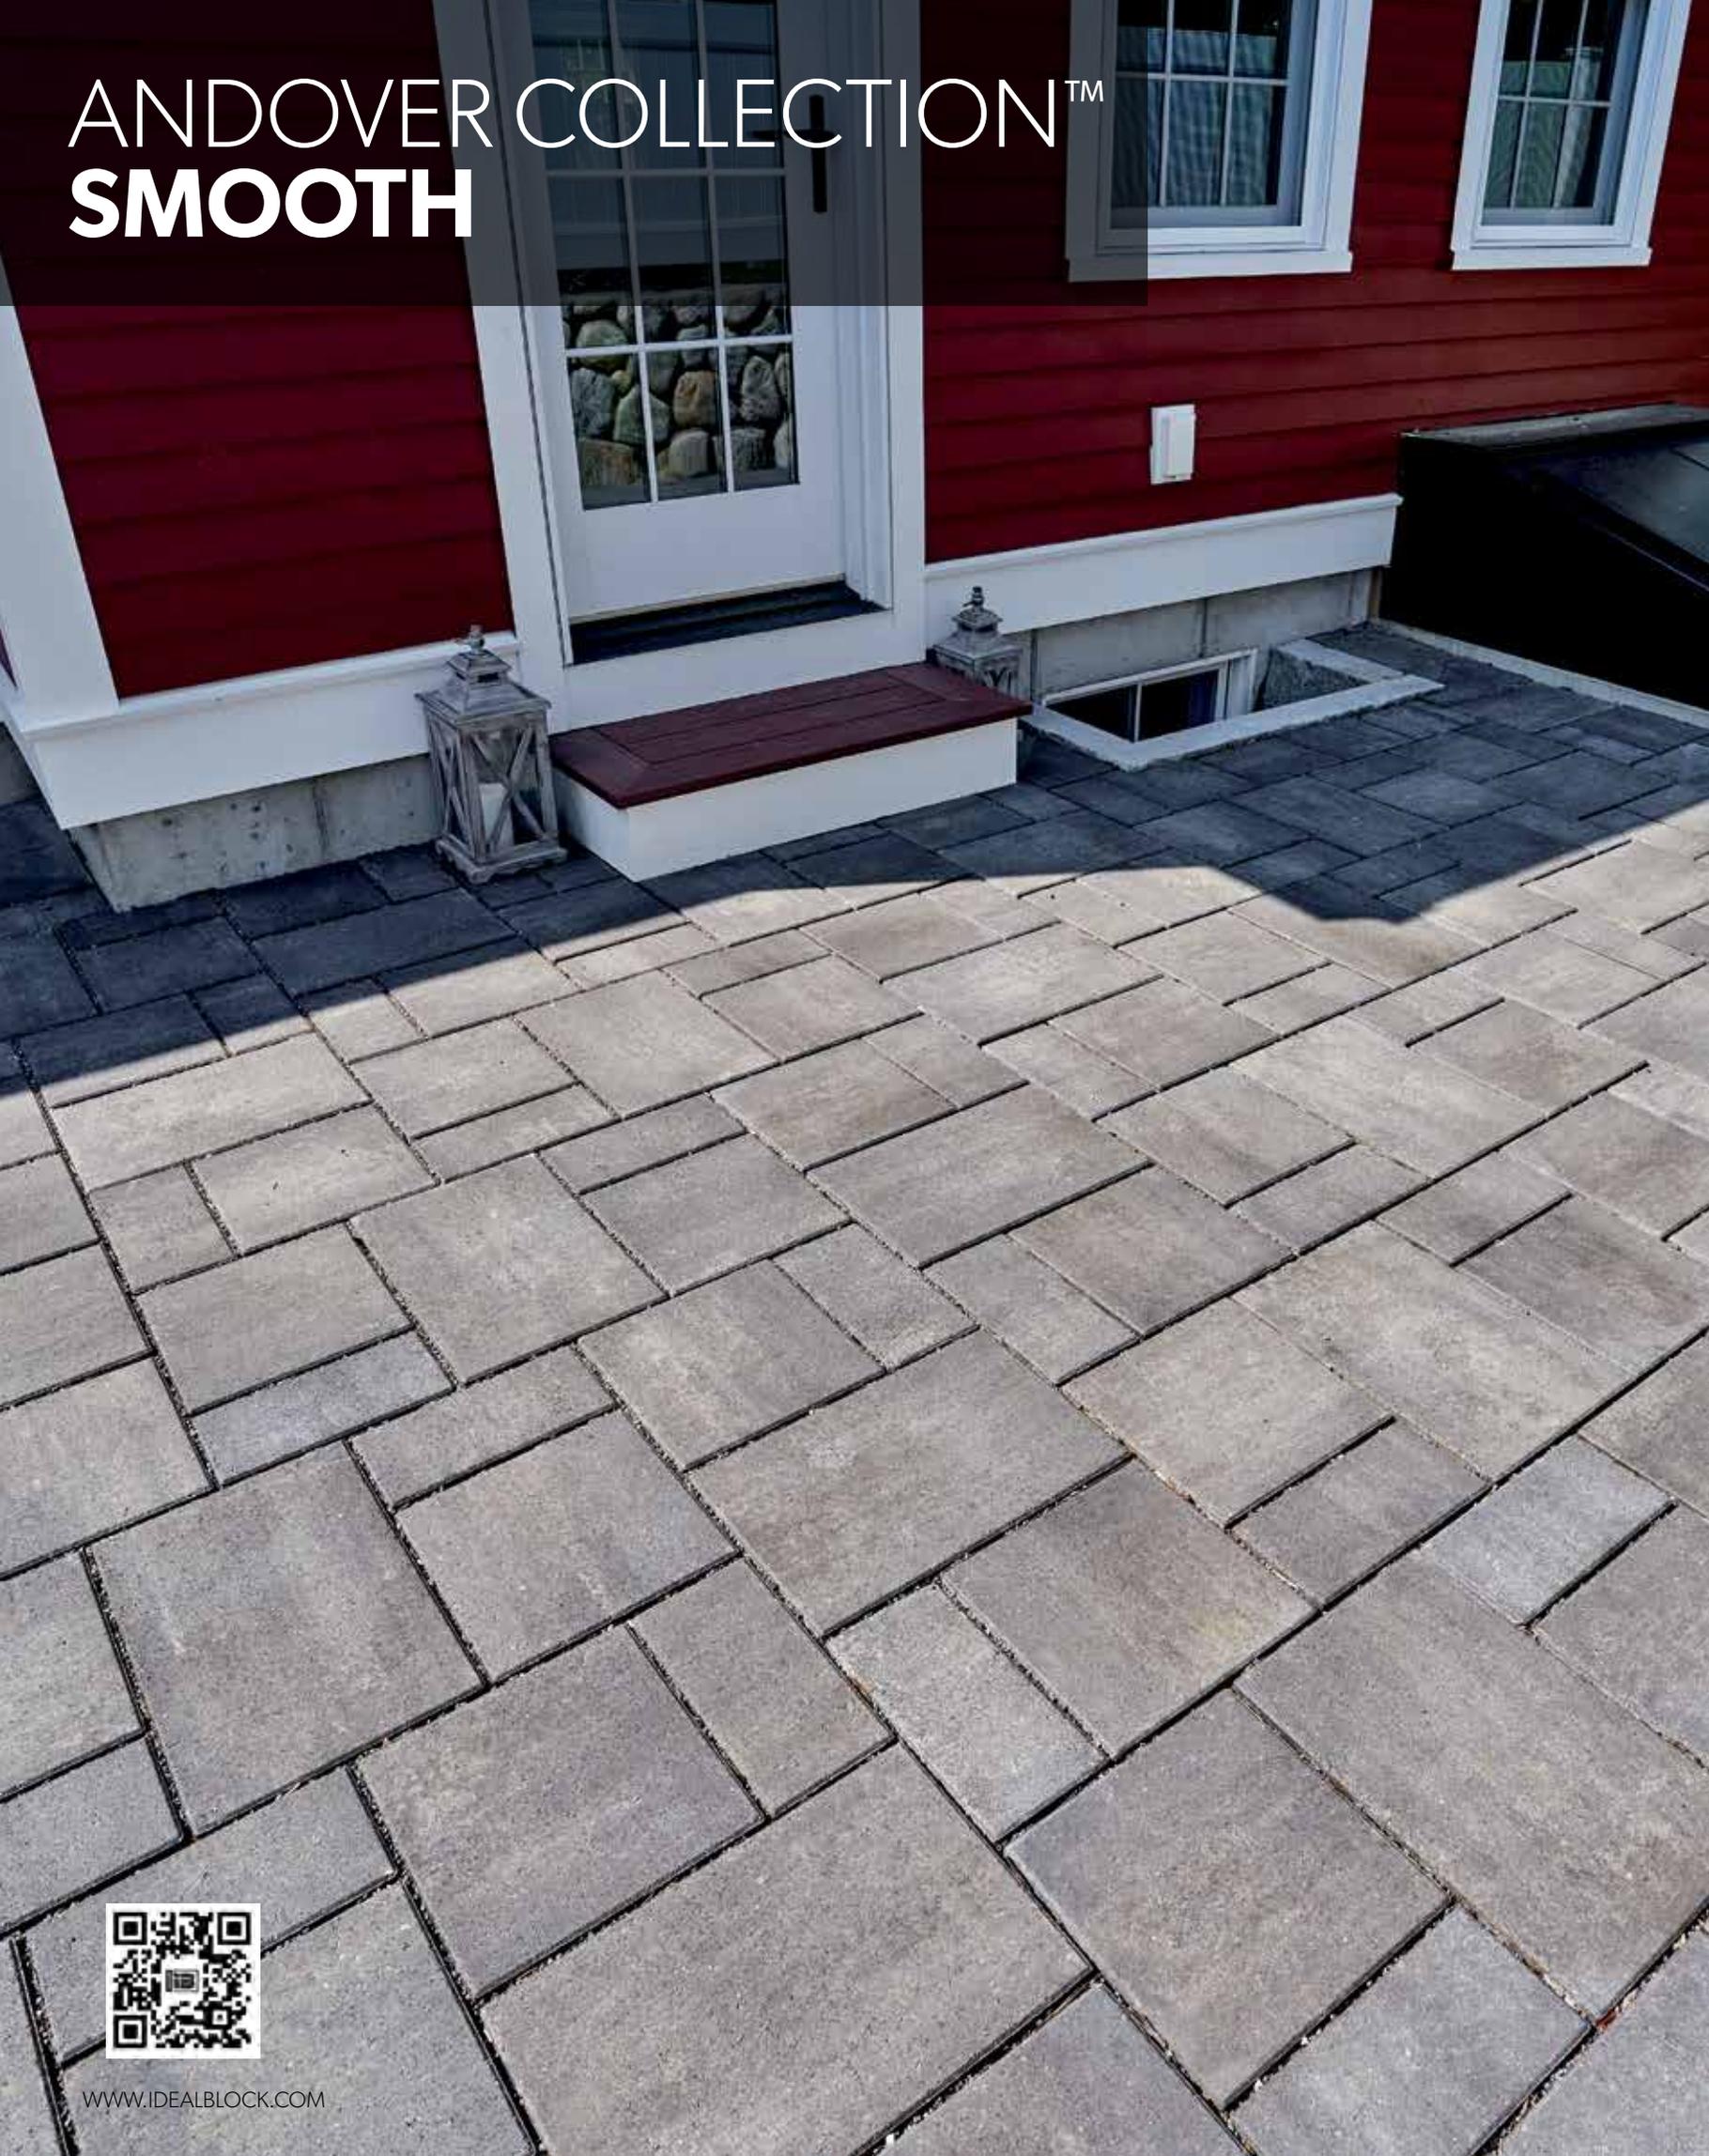

COLOR YOU CAN COUNT ON - TECHNOLOGY YOU CAN TRUST!

# UNIFRAME SYSTEMS KITCHEN KITS

Uniframe Systems outdoor kitchens are modular steel framing kits designed to make building a custom outdoor kitchen fast and easy. Each kit provides a strong, adjustable frame that supports premium built-in grills, storage components, and countertops, and can be finished with stone veneer, panels, or other materials for a clean, custom look.

## IDEAL BLOCK KITCHEN KITS

Ideal has taken the next step in outdoor kitchen design! We now offer full kitchen kits that are easy to assemble and ready to finish. With a flat packed Uniframe kitchen frame, two different natural stone counter color options and premium Novo appliances. All in stock, these kits provide an easy way to price, transport and build a premium outdoor kitchen that you will be sure to love for years to come. Simply pair our kit with your choice of veneer from your local dealer and you are on your way to a professionally finished final product!

## CUSTOMIZE YOUR KITCHEN

Customize your outdoor kitchen with Uniframe Systems—a modular steel framing solution designed for flexibility and easy installation. Choose the kit layout that fits your space, add premium built-in appliances and storage, then finish it with your favorite countertop and exterior materials like stone veneer or panels. The result is a durable, custom outdoor kitchen built to match your style and how you entertain. Ideal Block and Uniframe Systems offer full design assistance. Simply contact your Ideal sales representative or local Ideal Authorized Dealer to get started today! If a kit layout does not match your space, we can provide a fully custom CAD layout of your kitchen designed to meet your needs, complete with takeoff quantities, veneer quantities and more.

**Ask your Ideal authorized dealer about  
fully custom kitchen designs.

# MEETING EXPECTATIONS

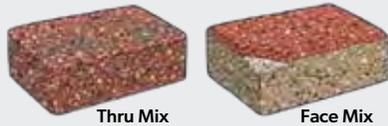

What should be realistic expectations for your pavement or wall? Our pavers, walls and garden products are commercial grade – unlike similar products found in large home improvement stores. Ours are factory made and delivered in ready-to-use condition that meets the highest industry standards. This means they are strong, dense and durable. Properly installed, your pavement and landscape walls will provide a lifetime of lasting beauty and dependable performance!

Ideal has made and sold hundreds of millions of paving stones and countless wall products since 1975. In fact, no other manufacturer has sold more in New England than Ideal. Our name has become synonymous with quality, service and reliability. While some manufacturers would lead you to believe their pavers and walls will never change in appearance, we believe in a more realistic expectation. After all, over time Mother Nature takes her toll on everything! We keep this in mind in our design. While normal wear and tear and exposure to the elements are part of the natural aging process, you can expect the color tones, shape and pattern of Ideal products to remain for a lifetime!

## Colors: Our Beauty is More Than Skin Deep

- Rich, consistent color throughout each paver and wall unit - not just at the surface
- Full-depth color allows chips, dings, and scratches to blend naturally into the material
- Everyday wear remains minimally visible, preserving long-term appearance
- Superior to products with surface-only face mix applications

## A Picture is Worth a Thousand Words

Images in this catalog are intended as a guide only. Lighting conditions, time of day, and printing limitations can affect how colors appear in photographs. Because printed images cannot exactly match actual concrete colors, we recommend viewing physical samples from your dealer or contractor in the intended installation setting before making a final selection.

## Our Process: It's Only Natural

- Crafted with natural ingredients for authentic character
- Subtle variations ensure no two pieces are exactly alike
- Color blends use multiple pigments for natural variation
- Solid colors feature nuances in tone and hue
- Concrete products naturally vary in color and texture
- Final product may vary from samples and catalog images
- For best results, purchase all material at once and install from multiple cubes simultaneously

## Tumbled or Traditional: We Come Close to Fooling Mother Nature

- Available in a variety of finishes to suit classic or vintage styles
- Pavers offered with traditional or vintage-inspired surfaces
- Wall styles include rugged split-face and tumbled finishes
- Genuine Drum-Roll Tumbling creates authentic old-world character
- Factory antiquing enhances color and texture while maintaining strength
- A time-intensive process that delivers true nostalgia and lasting durability

## Lifetime Warranty

We back our pavers and walls with a Lifetime Warranty on structural integrity for residential applications. If products are proven defective by failing to meet ASTM standards, they will be replaced at no cost; labor for replacement is not included, and replacement product color or finish may vary from the original product purchased. Proof of purchase is required, and all claims must be submitted and approved prior to product removal or disposal. Color variation, efflorescence, poly haze, normal wear and tear, and product film are excluded from warranty coverage. Additional exclusions apply. Visit [www.idealblock.com/warranty](http://www.idealblock.com/warranty) for full details.

## Affiliated Organizations

Ideal proudly supports organizations in the industry by taking an active leadership role in developing standards and best practices that serve to advance the industry for its members, community, and constituency.

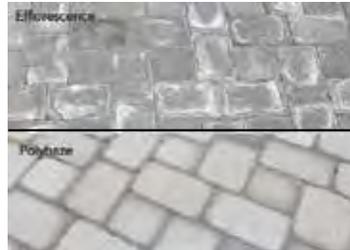

## Efflorescence, Poly Haze & Product Film

Efflorescence, poly haze, and product film are white surface residues that may appear on concrete and masonry products. While similar in appearance, each has a different cause:

- Efflorescence: a natural by-product of cement hydration
- Poly haze: residual polymeric sand left on the surface
- Product film: moisture-related streaking from storage conditions

These conditions are cosmetic only and do not affect durability, performance, or constitute a claim against our lifetime warranty. They typically fade over time with normal weathering or can be removed using specialty cleaners per label directions.

*For guidance, contact your dealer or contractor, or visit our website for more information.*

## Snow, Ice & Deicers

Our pavers and walls are built for strength and durability, standing up to harsh New England winters. When properly installed, they can be cleared with shovels, snow blowers, or plows using rubber or poly cutting edges. Paver surfaces are slip- and skid-resistant when wet; but melting ice can still be slippery, so caution is advised. Sand is recommended for traction—it's effective, visible, natural, non-corrosive, and easy to remove by sweeping or blowing off into surrounding areas. Concrete pavers are highly resistant to deicing chemicals, with proven long-term performance. If a deicer is used, sodium chloride (NaCl) is recommended. Magnesium chloride, potassium chloride, and blended deicers, which may damage concrete and other materials, void our lifetime warranty.

## Color & Product Packaging Directory

Our Color & Product Packaging Directory provides a clear overview of available colors and packaging options across our product lines. It is designed to help customers, dealers, and contractors easily identify color selections, pallet configurations, and ordering details for accurate planning and specification.

*Please note: Product offerings may change during the year. Please visit [IdealBlock.com](http://IdealBlock.com) for the most up-to-date Color and Product Packaging Directory information.*

# INFORMATION

## ANDOVER COLLECTION™, GRANDSTONE™, 5511™, NEWBURY BRICK™ PORTSMOUTH COBBLE™, BROOKLINE SLAB, & RIDGE HILL COLLECTION™

This product is susceptible to scuffing during installation and snow removal. Protect the surface when transporting and handling. Use a roller compactor or urethane pad attached to the compactor plate when compacting. When removing snow, the height of snow blowers and plows must be raised or a poly blade used on the plow edge.

## STRAIGHTLINE™ & YANKEE COBBLE™

This product is susceptible to scuffing during installation. Use a urethane pad attached to the compactor plate or sheet of geotextile fabric over the surface when compacting.

## WINDSOR SLAB™

This product is susceptible to scuffing during installation and snow removal. Protect the surface when transporting and handling. Use caution not to chip edges when placing with clamp. Roller equipped compactor ONLY to be used when compacting. When removing snow, adjust height of snow blower shoes to avoid scratching surface. Do NOT plow.

## GRAPHITE

Products of this color are susceptible to scuffing during installation. To avoid visible scratches use a urethane pad attached to the compactor. Non-Color 4D products in Graphite color, should be sealed with SEK 8700 sealer to maintain fastness.

# PROFESSIONALLY INSTALLED OR DO-IT-YOURSELF? WE CAN HELP

Deciding often depends on the size and scope of the work, as well as how ambitious you are. While small walks may be a weekend project, others will take far longer. Your Ideal dealer can suggest contractors suited for your project. Be sure to check references, visit projects they have installed, make sure they have insurance and...get it in writing!!

Visit our website [www.IdealBlock.com](http://www.IdealBlock.com) for more helpful tips on hiring a contractor. For the ambitious DIY-er we have easy-to-follow instructions that will guide you step-by-step for beautiful results. Ask your Ideal Authorized Dealer for one of our paver or wall installation booklets or download them from our website.

## TRADITIONAL PAVER INSTALLATION

- Excavate and thoroughly compact area to be paved.
- Install and compact base in 2-4" layers (1 1/2" processed gravel or 3/4" minus crusher run).
  - Typically 4-6" deep for walkways and patios
  - Typically 6-8" deep for pool decks
  - Typically 8-12" deep for driveways
  - See your Dealer for more information
- Install edge restraints directly on the base and secure with 10" steel spikes.
- Spread coarse concrete sand as a setting bed and screed to a uniform depth of 1" thick.
- Starting from a 90° corner, place pavers in desired pattern and cut where necessary to fit. Use 2 3/8" and 2 3/4" thick pavers for most residential applications and 3 1/8" thick pavers for commercial vehicles.
- Compact the pavers into the sand bed with a plate compactor, roller compactor or rubber mallet.
- Sweep dry sand into joints and compact. Repeat procedure until the joints are full. If using polymeric sand follow manufacturer's directions.

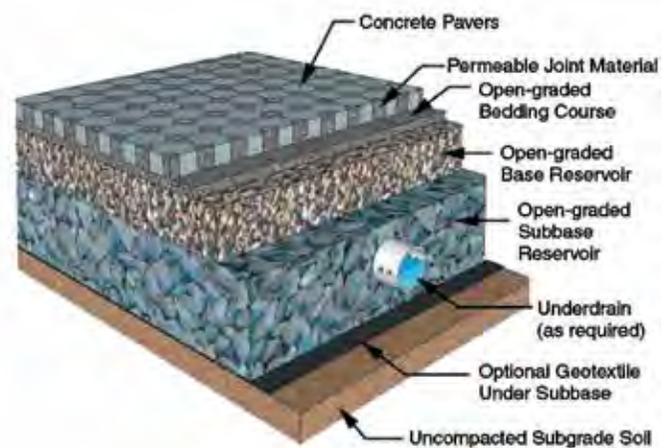

*Note: Poor draining soils, such as clay, may require additional excavation and base material and the use of a woven geotextile fabric.*

## PERMEABLE PAVER INSTALLATION

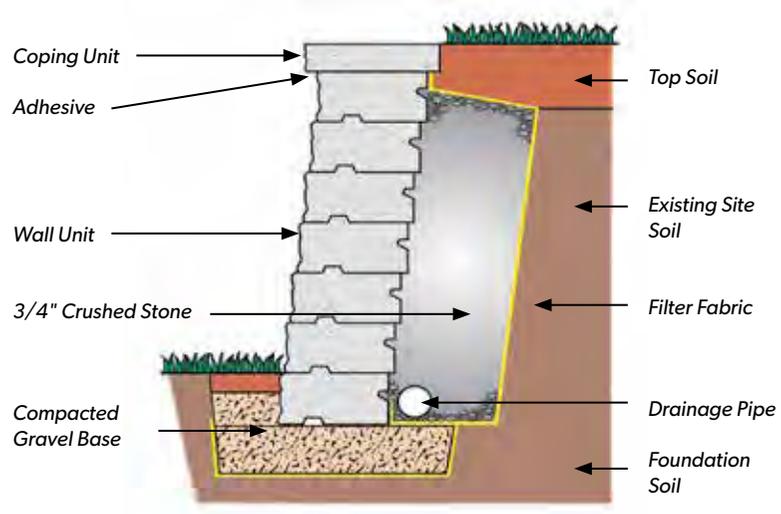

While similar to traditional pavers, this installation method contains a few important differences.

- Processed gravel can be used as a base, but we recommend open-graded stone, preferably 1 1/2" open-graded crushed stone, for peak performance.
- Deeper excavation is required.
  - Typically at least 6-8" for walkways and patios
  - Typically a minimum of 8-12" for driveways
- The setting bed increases to 2".
- 3/8" crushed stone is used for the setting bed.
- 1/4" chip stone is used to fill the joints and openings.
- Edge restraint requires the use of the Berm Method, CurbStone Edging, SEK PermEdge, or SEK EdgeCrete.

## RETAINING WALL INSTALLATION

- Excavate a trench at least 12" deep by 24" wide for the length of the wall.
- Compact the subgrade soil thoroughly and line the excavated area with landscape fabric.
- Fill the trench with 1 1/2" processed gravel or 3/4" crusher run base material and firmly compact in 2-3" layers until base is at least 6" thick.
- Place and level the first course of wall units on the base.
- Place perforated pipe behind the wall for drainage and backfill with 3/4" crushed stone.
- Place successive courses by stacking wall units on top of the row below, staggering joints as you go.
- Depending on the style wall selected, units will connect and automatically step back with plugs or a tongue and groove.
- Backfill with 3/4" crushed stone behind each course and in each core of the block if applicable and compact.
- Finish the wall by attaching the coping units with professional grade wall block adhesive.

## SPECIAL CONSIDERATIONS

Walls 39" and higher, terraced walls, sites with weak or wet soils, slopes and other loading conditions, such as a driveway above the wall, require special consideration. These should be built as reinforced walls using other construction techniques, including the use of geogrid. A civil/soils engineer and a professional contractor should be used for these situations.

GravityStone® retaining walls, pillars, and free-standing walls require different construction methods. Please see our wall guides available at [www.IdealBlock.com](http://www.IdealBlock.com) for more information on installation.

Play it safe and contact your Ideal Block Authorized Dealer for more information regarding the above special considerations.

**QUALITY • SERVICE • RELIABILITY**

**Ideal** – A 4th generation family-owned business, we take pride in honoring the Ideal tradition of quality and service, which has been proudly passed down through four generations of the Burgoyne family.

**A name you can rely on!** – We have made New England our home for over 100 years and, in 1975, were one of the first companies in the United States to manufacture concrete pavers. We bring you over 50 years of experience and have sold millions of square feet of pavers and countless walls throughout New England! You can feel confident using Ideal. Our products are backed by a Lifetime Warranty and our name. After all, you might say we are time tested...since 1923.

**Our commitment to quality** – We take great pride in producing the finest concrete products. They are manufactured according to strict industry specifications and benchmarked by our exacting internal standards. Our commitment to excellence ensures superb quality, exceptional strength, lasting durability, and consistent, rich color.

**We are here for you** – Ideal values our relationship with our customers. We have partnered with an extensive network of Authorized Dealers throughout New England who share our core values to provide responsive customer service and expertise that meets your needs.
